

# Hungary

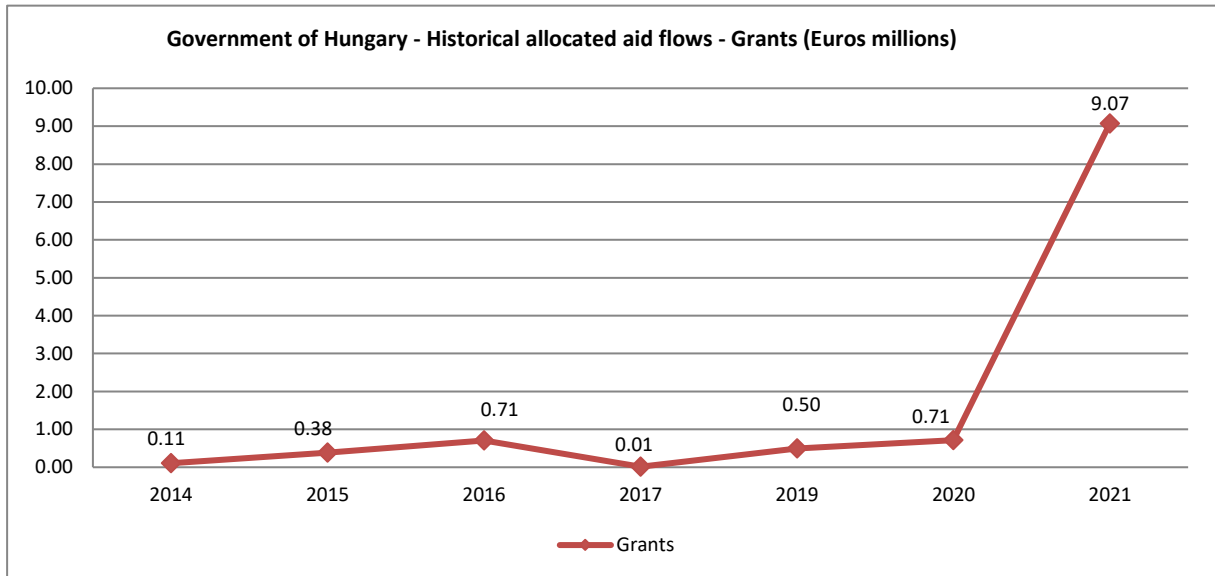

## Policy approach

Hungary seeks to contribute to the sustainable development of Bosnia and Herzegovina and its local communities in a manner consistent with their needs and demands, as well as the Sustainable Development Goals (SDGs) and socio-environmental concerns. The Government of Hungary strives to provide assistance where it is most needed, thereby addressing BiH as one the most burden with migration. Concurrently, Hungary recognises that international development cooperation is an important enabler of, and tool for promoting, economic partnerships and economic development more generally. As such, Hungary’s International Development Cooperation Strategy seeks to stimulate the enhanced involvement of the private and civil sectors in development.

## Key activities in 2021

The Government of Hungary **allocated € 9.07 million and disbursed € 9.07 million in 2021 in the form of grant** to the following sectors: Education, employment and social policies, Competitiveness and innovation and Environment and climate action.

### Medium and long-term approach

Hungary would like to place greater emphasis on the implementation of strategic, tailor-made bilateral development cooperation programmes with BiH, based on local needs and demands, taking into account socio-environmental concerns. Hungary seeks to enhance the country's development cooperation focus on those Goals in which Hungary or Hungarian actors have a comparative advantage. Hungary therefore prioritises the implementation of projects and programmes pertaining to water management and sanitation, agriculture, health, education, the environment and information technology, thus contributing in the most effective way as possible to sustainable development.
